On June 29, 2016, the Vice President is convening a Cancer Moonshot Summit, including conversations in communities across the United States. These Summits will be the first time that individuals and organizations representing the entire cancer community and beyond - researchers, oncologists, care providers, philanthropists, data and tech experts, advocates, patients and survivors – will all convene under the national charge to double the rate of progress towards a cure.

Join us here at USC Norris, together with local community leaders as we share updates and discuss efforts to accelerate progress in cancer prevention, diagnosis, treatment, and care. Please note Vice President Biden will not physically be on site.

More information about the Moonshot can be found here: https://www.facebook.com/events/1741920849357061
