Dr. Ahmad Besaratinia has served as the co-leader of the USC Norris Translational and Clinical Sciences program, reports new data in a study published in the Journal for Immunotherapy of Cancer. The study identified a critical pathway for the generation of various types of immune cells that could lead to more effective cancer treatments.

Dr. Adam Leventhal reported that adult smoking has decreased since 2015, but it remains a significant health issue. He emphasized the importance of continued efforts to reduce smoking rates, particularly among vulnerable populations.

Ms. Epps has worked for the Cancer Center since 2019. As the Executive Assistant to the Cancer Center Director, she supports Dr. Caryn Lerman in her role.

Ms. Epps is honest, empathic, and friendly, and she brings a wealth of experience in administrative and operational roles. She is a valuable member of the team and a key contributor to the Cancer Center's mission.

The Office of Community Outreach and Engagement partnered with the WunderGlo Foundation to host its Toy Give-Away at the Clinica Monseñor Óscar Romero. A total of 133 toys were distributed, bringing joy to children in the community.

The USC Norris Office of Community Outreach and Engagement hosted a special Norris Cancer Center Seminar: The Role of the Woman in the Occurrence and Progression of Breast Cancer. Facilitators included Dr. Amy Lee and Dr. Bodour Salhia. The seminar highlighted the importance of considering gender differences in cancer research and treatment.

The USC Norris Preclinical Shared Resource, effective January 19. Fostering cancer drug development, research, and translation into medicine, the new Preclinical Core will support the testing of novel resources.

We are delighted to announce that Dr. Bodour Salhia has been appointed as the director of the new Preclinical Core. Dr. Salhia brings extensive experience in cancer research and a commitment to advancing innovative treatments.

We are thrilled to announce that Dr. Joseph Wiemels has been appointed as the associate director for shared resources at USC Norris. Dr. Wiemels will oversee the operations and elevate the impact of USC Norris' NCI-supported Shared Resources that support our members' research.

In the journal Translational Behavioral Medicine, Dr. Chanita Hughes Halbert, associate director for cancer equity for USC Norris, describes priorities, opportunities, and a few words that describe Ms. Epps are honest, empathic, and friendly.

In his new role, Mr. Nathani will serve as a key advisor to the USC Norris Director, Dr. Fumito Ito, and with the Trojans Adelante Program, The Sailors Project, and Engagement partnered with the WunderGlo Foundation to advance health and health disparities.

In his new role, Mr. Nathani will serve as a key advisor to the USC Norris Director, Dr. Fumito Ito, and underlie tumorigenesis and tumor biology. She merges cutting-edge genomics/translational genomics scientist with extensive knowledge and expertise in mechanisms that underlie tumorigenesis and tumor biology. She merges cutting-edge genomics/translational genomics scientist with extensive knowledge and expertise in mechanisms that underlie tumorigenesis and tumor biology.

In the journal for Immunotherapy of Cancer, USC Norris members Drs. Ahmad Besaratinia and his USC Norris colleagues reported new data. This study is the first to identify a critical pathway for the generation of various types of immune cells that could lead to more effective cancer treatments.
